

**Precision in steel –  
for tomorrow's  
requirements**

 **saarstahl precision**  
We are Pure Steel+

# The Plus for customers – Precision from a single source

With Saarlühl Precision, we bring together the expertise of four experienced downstream processing companies within the Saarlühl Group – all united under a long-standing brand. Each of our units contributes its own area of specialization, and by presenting ourselves jointly, we make these strengths even more accessible to our customers. Whether drawn wire, bright steel, welding filler metals, or cold strip: together, we stand for high material quality, reliable processes, and precise solutions. Through close collaboration, we create an offering that goes far beyond individual products.

For you, this means: a broad portfolio, short decision paths, clear points of contact – and precision from a single source.

# Precision in wire

## Saarstahl Precision Wire

For us, the development and production of wires as well as straightened and cut-to-length bars for demanding applications are at the heart of our work.

Our expertise in achieving excellent surface quality, combined with our outstanding wire rod base, makes us one of the leading suppliers on the European market. We rely on high-performance equipment, technologically advanced processes, and experienced, highly skilled employees.

# Precision in welding

## Saarstahl Precision Welding

We produce high-quality products with a focus on wires and rods for gas-shielded welding of hardfacing and tool steels.

In addition, we manufacture wires for thermal spraying – both for conventional spraying processes as well as for the various technologies used to coat engine cylinder bores (Cylinder Bore Coating – CBC).

# Precision in bright steel

## Saarstahl Precision Bright Steel

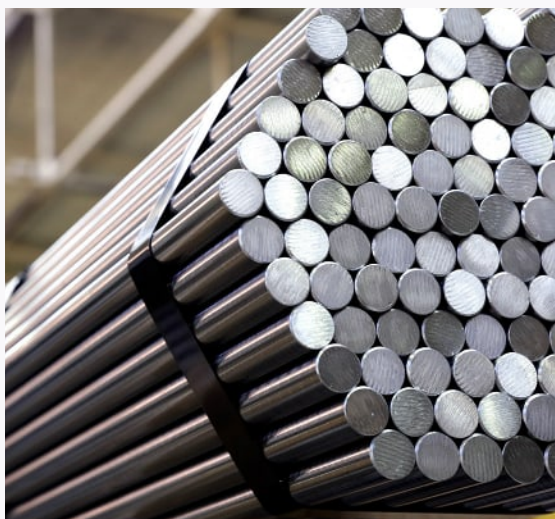

As a specialist for the most demanding bright steel products, we have been at the forefront of new developments for more than 25 years.

Innovative, high quality solutions tailored to customer specifications are our trademark. Always one step ahead, we set standards – in product quality, in manufacturing technology, and in customer service

Production of our bright steel bars takes place at our two sites in Homburg/Saar and Burbach/Siegen.

# Precision in cold-rolled strip

## Saarstahl Precision Strip

As a renowned supplier, Saerstahl Precision Strip GmbH covers the full spectrum of cold strip production – the best prerequisites for manufacturing a wide range of products for numerous downstream processes.

Our customers, including leading automotive suppliers, companies in the electrical engineering industry, and manufacturers of metal goods, have relied on our high-quality materials for years.

Problem-solving competence and customer-oriented flexibility – these are the recognized advantages of our unit.

# Our Products

## Drawn wire

Cold heading wire

---

Free-cutting wire

---

Profile wire

---

Bare and copper-coated wire

---

Galvanized and bright galvanized wire

---

Galvanized and redrawn wire

---

## Welding wire

Bare or copper-coated welding wires

---

Spraying wires

---

Copper-coated spraying wires for cylinder bore coating (CBC)

---

Electrode core wires and straightened/cut rods

---

Bare and copper-coated welding rods

---

## Bright steel bars

Drawn bars (round, square, hexagonal, flat)

---

Peeled bars

---

Ground bars

---

Heat treatment for bright steel

---

Eddy current crack testing inline

---

Ultrasonic testing inline and standalone

---

## Cold-rolled strip

Cold rolled

---

Annealed and cold rolled

---

Cold rolled, annealed, and skin passed

---

Cold rolled, annealed, and rerolled to defined mechanical values, optionally stress-relieved

---

The steels are also available in fine-blanking quality

---

Edges: cut, deburred, rounded

---
