

Changing the world
sustainably with
steel.

 **saarstahl**
We are Pure Steel+

With pure quality and innovation for the energy transition.

Welcome to Saarstahl!

Steel is the sustainable material driving the transition to a climate neutral future. Our high quality steel can be found in the world's most innovative wind turbines and solar parks, in "green" railway tracks, and in pioneering spring steels for e mobility. With our specialty steels of exceptional quality, we have been advancing innovation for centuries.

The best steel for for tomorrow's world is CO₂-reduced.

Pure quality, pure innovation: Pure Steel+

Our steel has stood for high quality for centuries – and it will continue to do so with our new hydrogen based production process. We ensure this through intensive research, state of the art facilities, and the expertise of our skilled workforce. We are investing around 3.5 billion euros in our decarbonization project and are receiving public funding to support it.
